

American Recovery & Reinvestment Act Project Fact Sheetⁱ

Town of Brookhaven, Suffolk County – CWSRF Project Amount: \$10.4 million

Subsidized Loan = \$5.2 million @ 50% of Market Interest Rate / Principal Forgiveness = \$5.2 million

ARRA funding will support the planning, design, and construction of a new treatment plant to provide improved water quality to discharges to the groundwater of Long Island. The new energy efficient tertiary treatment plant will allow the Town to more consistently and efficiently achieve water quality requirements.

Village of Canastota, Madison County– CWSRF Project Amount: \$13.5 million

Hardship Loan = \$6.75 million @ 0% interestⁱⁱ / Principal Forgiveness = \$3.75 million (Balance of \$3 million from other sources)

ARRA funding will support the planning, design, and rehabilitation of the Village's treatment plant and construction of a storage tank to better manage high flows during wet weather. The improvements to the plant will allow the Village to more consistently and efficiently achieve discharge requirements, thus improving water quality.

Village of Cuba, Allegany County – CWSRF Project Amount: \$2.1 million

Subsidized Loan = \$1.05 million @ 50% of Market Interest Rate / Principal Forgiveness = \$1,050,000

ARRA funding will support the planning, design, and replacement of much of the Village's collection system and construction of improvements to their treatment plant. The new collection system will correct excessive inflow issues, while the improvements at the plant will allow the Village to more consistently and efficiently achieve discharge requirements, thus improving water quality.

Town of Cuba, Alleghany County – CWSRF Project Amount: \$5.3 million

Hardship Loan = \$1.9 million @ 0% interestⁱⁱⁱ / Principal Forgiveness = \$3.4 million

ARRA funding will support the Town of Cuba in constructing a wastewater collection system which will serve residents around the perimeter of Cuba Lake. Construction of this collection system will eliminate residential septage discharges currently impacting the water quality of Cuba Lake. The collected sewage will be conveyed to the Village of Cuba's newly improved treatment plant.

City of Hudson, Columbia County – CWSRF Project Amount: \$8.84 million

Hardship Loan = \$4.42 million @ 0% interestⁱⁱ / Principal Forgiveness = \$4,420,000

ARRA funding will support planning, design, and improvement of the City's wastewater treatment plant and pump station that will greatly reduce the potential for discharge of high wet weather flows into the Hudson River, as well as replacing treatment equipment to be more effective and energy efficient.

Village of Richfield Springs, Otsego County– CWSRF Project Amount: \$5.4 million

Hardship Loan = \$1.40 million @ 0% interestⁱⁱ / Principal Forgiveness = \$4 million

ARRA funding will support the planning, design, and refurbishment of the Village's wastewater treatment plant. The refurbished plant, originally built in 1972, will allow the Village to more consistently and efficiently achieve discharge requirements, thereby improving water quality.

Nassau County – CWSRF Project Amount: \$6.9 million

Subsidized Loan = \$3.45 million @ 50% of Market Interest Rate / Principal Forgiveness = \$3.45 million

Town of Oyster Bay, Nassau County – Project Cost: \$6.4 million

Subsidized Loan = \$3.2 million @ 50% of Market Interest Rate / Principal Forgiveness = \$3.2 million

This joint project, between the Town of Oyster Bay and Nassau County, will correct a longstanding issue of failed septic systems whose discharges have been identified as the primary cause of beach closures in the Mill Creek area. ARRA funding will support the planning, design, and construction of the collection system, pump station, and force main for the Locust Valley section of Oyster Bay in Nassau County.

Town of Rutland, Jefferson County – CWSRF Project Amount: \$2.23 million

Hardship Loan = \$450,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$1.78 million

ARRA funding will support the planning, design, and construction of collector sewers to connect the Hamlet of Felts Mills to the City of Watertown treatment plant addressing decades-old public health and water quality issues.

Village of Sackets Harbor, Jefferson County – CWSRF Project Amount: \$8.0 million

Hardship Loan = \$4 million @ 0% interestⁱⁱ / Principal Forgiveness = \$2 million (Balance of \$2 million from other sources)

ARRA funding will support the planning, design, and replacement of the Village's treatment plant and portions of the collection system. The Village's new plant, replacing one originally built in 1927, will provide better and more consistent treatment of wastewater, as well as correcting excessive inflow issues.

Town of Greenport, Columbia County – CWSRF Project Amount: \$9.4 million

Hardship Loan = \$4.7 million @ 0% interestⁱⁱ / Principal Forgiveness = \$4.7 million

ARRA funding will support the design and refurbishment of the Town's treatment plant, which was built in 1977 and is reaching the end of its useful life. The refurbished plant will provide better and more consistent treatment of wastewater, improving water quality into a tributary of the Hudson River.

Niagara Falls Public Water Authority, Niagara County – CWSRF Project Amount: \$11 million

Subsidized Loan = \$6.3 million @ 50% of Market Interest Rate / Principal Forgiveness = \$4.67 million

ARRA funding will support the removal of accumulated sediment and debris from and repair of the North Gorge Interceptor. This rock tunnel, built in 1937, conveys 53 million gallons of wastewater daily during dry weather. This cleaning and repair work will restore this tunnel back to its expected capacity.

Town of Catskill, Greene County – CWSRF Project Amount: \$231,000

Hardship Loan = \$46,600 @ 0% interestⁱⁱ / Principal Forgiveness = \$184,400

ARRA funding will support the design and construction of improvements to the collection and treatment system for the Hamlet of Cementon to correct problems with excessive flows from water inflow and infiltration into the system. These improvements, including wastewater disinfection, will help to improve the water quality of this discharge to a tributary of the Hudson River.

Town of Ticonderoga, Essex County – CWSRF Project Amount: \$4.1 million

Hardship Loan = \$820,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$3.28 million

ARRA funding will support the design and construction of various treatment plants and sewer upgrades for the collection and treatment of both sanitary wastewater and wet weather flows in the vicinity of the La Chute River, the discharge from Lake George into Lake Champlain. This work is part of a multi-year effort by the Town to improve these facilities and the quality of the discharge to Lake Champlain.

Village of Granville, Washington County – CWSRF Project Amount: \$1.3 million

Hardship Loan = \$260,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$1.04 million

ARRA funding will support the design and construction of improvements to the Village's treatment plant, which was built in 1970 and no longer is able to consistently achieve discharge standards. This work will replace key treatment components which will allow the Village to more consistently and efficiently achieve discharge requirements, thereby improving water quality.

Town of Greenville, Greene County – CWSRF Project Amount: \$728,000

Hardship Loan = \$145,600 @ 0% interestⁱⁱ / Principal Forgiveness = \$582,400

ARRA funding will support the design and construction of improvements to the Town's treatment plant, which was built by a private corporation and transferred to the Town in 1994. This work will repair or replace key treatment components which will allow the Town to more consistently and efficiently achieve discharge requirements, thereby improving water quality.

Town of Schroon, Essex County – CWSRF Project Amount: \$4.4 million

Hardship Loan = \$880,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$3.52 million

ARRA funding will support the design and construction of the refurbishment of the Town's treatment plant, which was built in 1973 and is reaching the end of its useful life. The refurbished plant will provide better and more consistent treatment of wastewater, improving water quality into a tributary of the Hudson River.

Town of Newcomb, Essex County – CWSRF Project Amount: \$1.8 million

Hardship Loan = \$360,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$1.44 million

ARRA funding will support the design and construction of the refurbishment of the Town's treatment plant, which was built in 1963 and is reaching the end of its useful life. The refurbished plant will provide better and more consistent treatment of wastewater, improving water quality into a tributary of the Hudson River.

Town of Essex, Essex County – CWSRF Project Amount: \$7.7 million

Hardship Loan = \$3.70 million @ 0% interestⁱⁱ / Principal Forgiveness = \$4 million

ARRA funding will support the design and construction of wastewater collection and treatment system in the Hamlet of Essex, a designated historic district. Failing septic systems in this Hamlet have impacted the water quality of Lake Champlain. This new collection and treatment system is expected to correct longstanding water quality concerns.

Town of Brasher, St. Lawrence County – CWSRF Project Amount: \$1.45 million

Hardship Loan = \$290,000 @ 0% interestⁱⁱ / Principal Forgiveness = \$1.16 million

ARRA funding will support the design and construction of a collection and treatment system for the Hamlet of Helena. Wells have become contaminated from failing septic systems within this Hamlet. Collection and treatment of wastewater is expected to eliminate this public health risk, as well as improve the water quality of the nearby St. Regis River.

Town of North Salem, Westchester County – CWSRF Project Amount: \$8.8 million

Subsidized Loan = \$7.20 million @ 50% of Market Interest Rate / Principal Forgiveness = \$1.6 million

Town of Southeast, Putnam County – CWSRF Project Amount = \$4.1 million

Subsidized Loan = \$3.36 million @ 50% of Market Interest Rate / Principal Forgiveness = \$740,000

This joint project, between the Towns of North Salem and Southeast, will correct a longstanding issue of failing septic systems along the shores of Peach Lake, which is part of the New York City water supply. ARRA funding will support the design and construction of the collection system, pump station, and treatment plant that is expected to improve the water quality of Peach Lake, as well as provide greater assurance of the purity of the drinking water for New York City.

ⁱ Total Project Costs are estimates based upon preliminary application reviews and are subject to change.

ⁱⁱ Hardship status is determined via pre-determined formula as published in the 2009 Final Intended Use Plan (IUP)
